Installation

9

Proceed through the GlobalProtect installation wizard prompts.

Mac OS needs to download and install
Mac 32/64 bit GlobalProtect agent.

Windows 32 bit OS needs to download
and install Windows 32 bit GlobalProtect
agent.

Windows 32 bit OS needs to download
and install Windows 32 bit GlobalProtect
agent.

Windows 32 bit OS needs to download
and install Windows 32 bit GlobalProtect
agent.

10 Click "Close"

VPN Configuration

11 Open the GlobalProtect application and enter vpn.gatech.edu as the portal address.

- 12 Log in to the GlobalProtect client with your username and password.

13 Confirm that the VPN status shows as Connected.

The mac client remains persistent in the menu bar even if you are not connected to the VPN.

If you wish to quit the client entirely, from a command line type:
`launchctl unload /Library/LaunchAgents/com.paloaltonetworks.gp.pangp*`

To launch the client again:
`launchctl load /Library/LaunchAgents/com.paloaltonetworks.gp.pangp*`
